

Education

2012-2016	Bachelor of Science in Financial Mathematics Brunel University , London	Award: First Class Honours 1st
	Key Modules: Advanced Mathematics, Investment Mathematics, Stochastic Models	

Technical Skills

Programming	MATLAB, SPSS, Python, SQL, R (Basic knowledge)
Other Software	SAP, Microsoft Office (Excel)

Work Experience

Sept. '18 - Current	Mathematics Tutor - Tutoring for multiple students in subjects related to secondary school Mathematics. - Simplifying complex concepts while coaching students to think critically to solve problems. - Devised methods that resulted in an average increase of test scores by more than 30 percent. - Working one-on-one with students to assist with homework. - Setting and subsequently marking and assessing pupils' work done both at school and at home.	Self Employed
Sept. '18 - Current	Founder - Prepare detailed analysis of properties by compiling financial data into an Excel spreadsheet for investors. These include operating and financial statements, tenants, leases, taxes and insurance. - Building and maintaining key relationships with investors. - Creating relationships with estate agents and investors for investment opportunities. - Created a marketing campaign through letters to find ethical investment opportunities.	Friends in Property
Sept. '18 - Jan. '19	Technical Operator - Operating and commissioning the new PET lines for production. - Carried out first line maintenance PPM's and routine diagnostic maintenance including lubrication schedules to maintain plant efficiency. - Carried out the required quality checks, and complete procedures for reporting the results. - Carried out all plant/product changeovers within agreed timescales/targets. - Ensured that all production is manufactured in accordance with the all Quality, Food Safety and -Health and Safety standards as specified in relevant site.	Britvic Soft Drinks
Mar. '17 - Sep. '17	Travelling - Travelled around South-East Asia, visited Japan, China, Hong Kong, Thailand, Laos, Vietnam and Cambodia. - Completed 1 week voluntary work in Yangzhou at an orphanage, teaching maths/English and helping to build extra toilets.	Southeast Asia
Sep. '17 - Apr. '18	Data Analyst - First point of contact, when dealing with any car sales enquires – through different mediums of communication. - Lead generation – using email and cold calling. - Handled the closing process of the car sale, making sure all documentation was corrected and up-to-date.	Dunchurch Motors Ltd.
Jul. '14 - Jul. '15	Finance Intern - Calculate and post Rates, Insurance, Quarterly Bonus/ELI and Bonus Release Journals on SAP. Calculate and post Debit Balances and Sales Ledger Credit Balances Journals on SAP by morning of working day 3. - Understudy to the project manager in WD8 project; involved in planning and organising meetings and representing the project team in meetings with senior managers. - Processing invoices and credit notes using three-way match process on SAP (Purchase order, goods receipt and invoice) to clear backed logged invoices by 35%. - Monthly CIS statement distribution for intercompany accounts and liaising with internal accounts receivable clerks to resolve any mismatches, then reporting on any large discrepancies which remain unresolved. - Dealing with client/vendor queries regarding unpaid/unresolved invoices/credit notes and liaising with branches/vendors to resolve this process.	Saint Gobain

Projects

Pricing Asian Options (66%)

Project involved studying different types of pricing methods for options. Conducted a literature review to compare and contrast the different pricing methods, produced a Gantt chart to outline project plan. Constructed various MatLab codes for a Monte-Carlo simulation to price Vanilla and Asian Options with comparison of the Black-Scholes pricing formula. Implemented and tested different Variance reduction methods in Matlab code, for a 30% more accurate price of the options. Coded my entire dissertation using Latex software.

Financial Development (72%)

A project to investigate data from five stocks and calculated the historical rates of return of the five stocks over a 1 month investment period. Extracted data from online resources into Excel – used pivot tables to cut relevant data. Constructed mean-variance efficient portfolios, using Excel formulae. Reported on the five stocks, from the results of the efficient portfolios to answer investment mathematics questions regarding – rates of return, portfolio analysis and variance reduction.

SPSS Development (72%)

A group project to analyse and interpret raw data, and comprise hypotheses test to investigate. Elected as team leader by my fellow members; gaining leadership experience in a project environment. Selected raw data on European countries and choose different test variables to specify the data. Used statistical analysis to select three different hypotheses tests to investigate given data. Created reports using SPSS after constructing different statistical analysis to match each hypotheses test. Presenting our results to fellow students in a lecture, through group presentation.

AmarNotay.co.uk, my personal website

I am in the process of building amarnotay.co.uk, a website which will contain information about myself and my history. Currently the website is written in pure HTML, CSS, JavaScript, with the responsive layout being design using Bootstrap. I am going to be creating this website in order to learn about web development and to further my knowledge on programming languages.

About Me

- Programming and learning new technologies has recently become a new interest of mine, I hadn't had much exposure to this world prior to graduating but recently find myself wanting to learn more.
- I consider myself quite a social person and enjoy group outings with my team; I frequently go to escape rooms and other group activities which I think is beneficial for a team to mesh together
- I love animals, and have a Rottweiler called Pablo. I love training him and teaching him and my end goal is to teach him to fetch me something from the fridge (although it's a little more difficult than I anticipated)
- I train four times per week in the martial arts of Brazilian Jiu Jitsu under Professor David Wosman for Gracie Barra, train for self defence and competitions - currently a 3rd stripe white belt. I recently won the silver medal at the BJJ Nottingham Open 2019 at Super Heavyweight
